

RTX Technologies Selects Redline Trading Solutions for U.S. Equities Market Data

New York, NY – 4 March 2020 – Redline Trading Solutions, the premier provider of high-performance market data and order execution systems for automated trading, announced today that RTX Technologies has selected Redline Trading Solutions’s low latency U.S. Equities market data feed.

RTX Technologies’s integrated retail trading platform will benefit from Redline’s award-winning RedlineFeed, a highly reliable and low latency market data solution. RedlineFeed will support RTX’s platform, which creates competition to interact with retail orders and searches for the best deals in real-time and on a per-order basis, significantly modernizing the retail order handling and executions.

“We evaluated Redline offering rigorously and observed their proven track record in providing similar solutions to high performance trading systems. Redline’s intense focus on product quality and culture of superior client service further helped us select Redline,” said Rajendra Jain, Co-founder & CEO at RTX Technologies.

“We are thrilled to have been selected by RTX Technologies to meet their demanding platform requirements,” said Mark Skalabrin, CEO of Redline. “It will be a pleasure to be an integral part of an innovative trading platform. Redline shares with RTX, a culture of passion for product quality and performance.”

About RTX Technologies LLC

RTX Technologies is a trading technology company executing patent pending vision of creating out-of-the box trading tools and a marketplace that modernizes retail trade executions. RTX solutions will democratize retail trade executions by integrating various participants, currently not involved, through an infrastructure that creates the best deal for retail orders. RTX is implementing its platform for US equities first, and it will be followed by other asset classes. For more information, please visit www.rtxllc.com
